

Consolidated Liabilities (“FR XX–1”) to calculate liabilities of these institutions.

Under Regulation XX, liabilities of a foreign banking organization’s U.S. operations are calculated using the risk-weighted asset methodology for subsidiaries subject to the risk-based capital rule, plus the assets of all branches, agencies, and nonbank subsidiaries, calculated in accordance with applicable accounting standards. Liabilities attributable to the U.S. operations of a foreign financial company that is not a foreign banking organization are calculated in a similar manner to the method described for foreign banking organizations, and liabilities of a U.S. subsidiary not subject to the risk-based capital rule are calculated based on the U.S. subsidiary’s liabilities under applicable accounting standards. The Federal Reserve used information collected on the Capital and Asset Report for Foreign Banking Organizations (“FR Y–7Q”), the FR Y–9C, and the FR XX–1 to calculate liabilities of these institutions.

By order of the Board of Governors of the Federal Reserve System, acting through the Director of Supervision and Regulation under delegated authority.

Ann E. Misback,
Secretary of the Board.
